

W-DMX™ TEST TOOL

W-DMX™ UGLYBOX

The UglyBox is hailed as the 'riggers best friend', an indispensable tool in the lighting designer or technician's arsenal. With the capability to receive W-DMX™ signals to check their signal strength, as well as check the output of DMX channels, the W-DMX™ UglyBox is great for testing the limits of the W-DMX™ radio system and/or checking DMX data, in a portable, pocket sized device.

The UglyBox is great for checking if a system will work before installation, and checking DMX levels in a system. The W-DMX™ UglyBox can also be used to check W-DMX™ signal history, allowing the user to see quickly any transient problems in the system. The Uglybox runs on standard AA batteries and last over 8 hours.

W-DMX™ CONFIGURATION TOOL

W-DMX™ DONGLE

The W-DMX™ dongle is our ideal tool for configuring W-DMX™ units, when the full power of the W-DMX™ BlueBox RDM is not required. Channels in use can be manually configured (bypassing the AFHSS technology), and output power can be reconfigured quickly and easily.

With the basic mode, W-DMX™ channels can be disabled by selecting which Wi-Fi channels are in use, and in the advanced mode, power users can disable individual W-DMX™ channels for finer control of the radio spectrum.

The W-DMX Dongle also is used to update firmware on all W-DMX. We recommend you to have the dongle in the toolbox to make sure you always have the latest software from Wireless Solution

OUTDOOR POWER AMPLIFIER TO GAIN POWER UP TO 1000mW

W-DMX™ BOOSTER

	BlackBox B-5000 Outdoor	BlackBox B-1000 Outdoor
